LEARNING AND TEACHING FOR ENVIRONMENT AND SUSTAINABILITY

What knowledge, understanding and skills do graduates from higher education need in the Environment and Sustainability field?

We developed learning standards by asking stakeholders throughout Australia and around the world . . .

This was a 12-month project, commissioned by the Australian Council of Environmental Deans and Directors. This project was a collaboration of the University of Newcastle (lead institution), Australian National University, Flinders University, Macquarie University and University of New South Wales. Support for this project was provided by the Australian Government Office for Learning and Teaching.
